EQUIPMENT:

Equipment and systems covered by this Certificate are as follows:

The SmartPurge Z purge and pressurization system is an electrically operated device, designed to offer type of protection pressurized enclosure to unspecified electrical equipment or enclosures.

The SmartPurge Z controls the flow of purge media through the protected equipment. During purging, the system provides a predetermined flow rate of protective media for a pre-set period. After purging, the SmartPurge Z maintains the protected equipment pressurized.

The SmartPurge Z system provides one of the following methods of purge and/or pressurization operation:

- AL – Automatic Leakage Compensation
- CF – Continuous Flow
- DP – Dust Pressurization
- LC – Leakage Compensation

The SmartPurge Z includes a Relief Valve to allow the exit of the purging media and to protect the pressurized equipment from overpressure.

SPECIFIC CONDITIONS OF USE: YES as shown below:

- Potential electrostatic hazard, see instructions.
- When polymeric cable gland is used on the side/external entry, the installation shall guarantee that the cable gland will be only exposed to a low risk of mechanical danger (< 4J impact).
- When the SmartPurge Z is used with a pressurized enclosure, the assembly shall be evaluated according to the requirements of IEC 60079-0, IEC 60079-2 and IEC 60079-31, as applicable.
